

INSTRUCTIONS

Creating an Appli-Quilt Block:

After creating and saving your Appli-Quilt block, follow these steps to create the block on your embroidery machine.

1 (Cutting Machine) apply Floriani Appli-Kay Wonder to the back of the fabric. Then, cut the block pieces using a cutter machine.

(Hand Cut) If the Appli-Quilt pieces are being cut by hand, the sheet of Floriani Appli-Kay Wonder must be printed first. Roughly cut the printed pieces, fuse them to the fabric and carefully cut them out along the pattern.

2 Hoop a piece of Floriani No Show Nylon Mesh and stitch out the first color in the design directly to the mesh. This will be the placement line for the fabric pieces.

3 Remove the hoop from the machine (do not remove the Mesh from the hoop). Then, peel back the Floriani Appli-Kay Wonder release paper and stick the fabric pieces into their locations.

4 Press the pieces for 3-5 seconds on medium heat in each area while the mesh is still in the hoop. This step helps prevent the fabric from shifting while decorative stitches are sewn.

5 Place the hoop back into the machine and press start. All the decorative stitches will lock the pieces together and finish the Appli-Quilt Block.

When the stitching is completed, the block is done. Unhoop and trim excess mesh around the edge of the block.
