People with Total Quilter as a stand alone software should visit the Floriani Quilting Software Update Videos Archive to watch the Build 3776 update video and learn what is new in Total Quilter build 3776.

However if you have Total Quilter combined with FTCU then there are more videos to watch on the FTCU update page. You will find that Total Quilter can now save to formats such as PES 11 and VP4. We have added some new options in the zoom drop down menu to make it easier to zoom to selection and zoom to 1 to 1 (1:1) sizes. Now when you save your design any guidelines you have created will save with the design and will still be there the next time you open the design.   The same for images you load as a backdrop, now when you save your designs the images will be remembered and open again with the design. We also added the ability to remove a backdrop from a design if you are finished with it. We updated the ability to display variegated thread in the design browser and open window. Another enhancement to Total Quilter is that we now have the ability to display any color from the thread pallet as the fabric color of an appliqué.

We hope you enjoy the updates to Total Quilter in build 3776.
