

Floriani Quilting Software Update

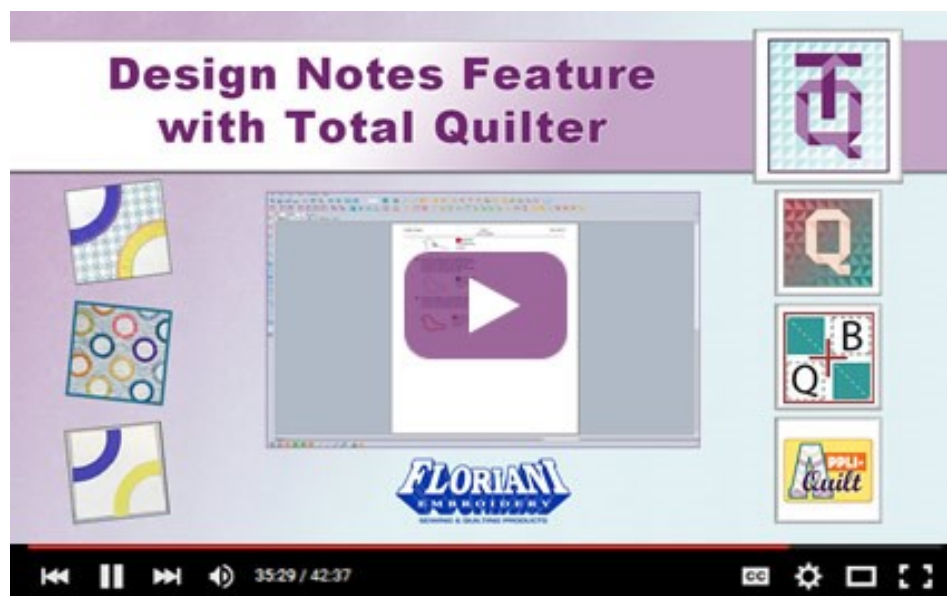

Build 3482

Release Date: 3/11/2019

Sequence View Notes

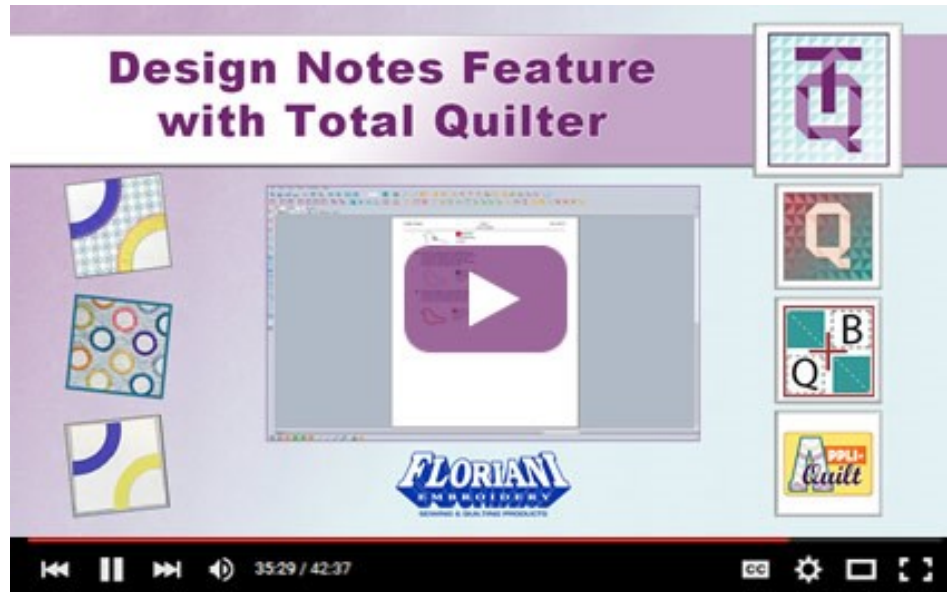

This exciting new feature allows you to add notes to a design in a unique way. You can add and view them right from the sequence view in a design. These notes will even print – in order – with the color sequence. These are great for when there are things you need to make sure you do when creating designs or when embroidering them. For example, when doing applique designs you can add notes between the placement, tackdown, and border stitches to remind you or someone else when to lay the fabric down or cut the excess fabric away when necessary. You can create a note before or after any object in a design.

Batch Converting Quilting Formats

In this build we added the ability to batch convert designs from one format into many formats, including long-arm quilting formats.
