Total Quilter Update Summer 2020

The Total Quilter Update Summer 2020 brings several new abilities to the program, like the new Match Pallet tool, which changes the colors of an embroidery design from one thread brand to another in a single click. We have enhanced the sequence view with new up and down arrows to make it even easier to change the sewing sequence of a design. There is a new stitch counter on the enhanced Slow Redraw tool bar and an easy to use tool for inserting a color stop. Instead of separately installing all the software, this update combines all of your Floriani programs into one. If you own more than Total Quilter, you simply get the latest install of the Floriani Software and all of your programs will be up to date.   This update makes it possible to blend Total Quilter with other Floriani programs, like Sketch A Stitch or Lettering Master. In the past, you needed to own FTCU or Fusion to blend your Floriani software together, but now you can bled Total Quilter with any other Floriani programs. Please enjoy all of the updates to your Total Quilter program in the summer of 2020. Learn about all of the new abilities in this update video.
