

Floriani Total Control U Update

Build 3984 – August 2025

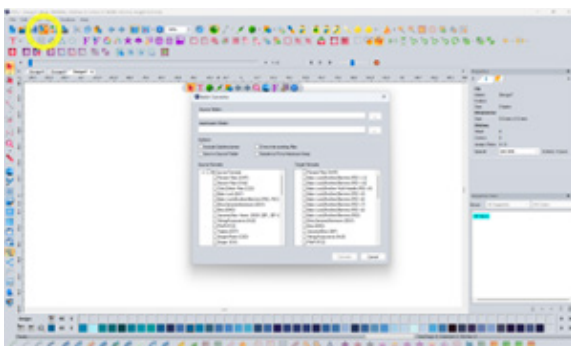

- This build is the first that makes it possible to purchase Floriani Design Finder Plus and Floriani Monogramming and Customizing programs.

- New Floriani Embroidery Design Finder Window. The browser, library and designs tabs are removed and replaced with the "design finder window". Look for the new tool icon that will open the design finder window that comes with several new abilities. Finding designs is made quick with the ability to search through subfolders and display entire collections of embroidery designs with icons making it easy to see what you have. Use the filter for design format or name to reduce the results.

Select a design and double click to open or click and drag to merge designs onto the same hoop. Convert one or more designs to multiple embroidery formats all at once. Use the details area at the bottom to learn more about the design and even add notes to your WAF designs and they will auto save with the design. You can use the finder window to save your designs into image formats so you can email samples to your friends or customers. The finder window comes with the ability to make new folders, copy, paste and anything you need to manage your embroidery library. Floriani's Embroidery Design Finder is the ultimate tool to browse find and manage your embroidery collection.

- New tool icon for Batch Converter added to the main menu making it easier to find and use. This tool is perfect to convert designs in large batches.

- New tool icon for Font Importer added to the main menu to make it easier to find and use. If you purchased a font that came as individual designs for each letter this tool will allow you to create a Floriani keyboard font out of them.
